September 2018 — Present

Conestoga College | Kitchener , ON , Canada.

B-Tech (Computer Science and Engineering)

Aug 2013 — May 2017

Rajasthan Technical university | Rajasthan,India

PROJECTS

■ Tiffin Dabba (E-Commerce)

This was my own idea for selling online food, in this project I had used ASP.NET with C# and MS SQL for the database.

■ Khana Khajana (E-Commerce)

This was a restaurant website which sells online food as well. In this project the server-side language was ASP.NET with C# and I used the Data Entity Model for the database.

■ Tiffin Dabba (E-Commerce App)

This was the android application of website build in ASP.NET. I had used Android SDK and ASP.NET we service (XML Parsing) for communication between the server and android app.

- **Conestoga Eats (E-Commerce App)**

In this android application, I had used SQLite for database and Geolocation for fetching current location of the user to calculate the distance between user location and selected restaurant location.

- **Book Store (CRUD)**

In this basic website, I had used REST API with JSON parsing to communicate between client-side Angular and MongoDB database.

CERTIFICATION

- Completed certified course in ASP.NET with C# and Android App Development
